

TECHNICAL INFORMATION

EPOSOLVE® 299-R

PRODUCT DESCRIPTION

EPOSOLVE 299-R is a non-red label, liquid solvent designed for attacking and disintegrating such fully cured thermoset plastics as epoxies, urethanes and polyesters. It is also an efficient clean-up solvent for tools, brushes, automatic dispensing equipment and spilled uncured resins. This solvent does not contain ozone depleting chemicals (ODC).

HOW TO USE

EPOSOLVE 299R works best when you totally immerse the part and agitate the solvent bath. Periodic brushing or scraping the surface aids in removing thick sections of cured material. Where possible, remove any solvent sensitive components such as O-rings and seals.

TYPICAL PHYSICAL PROPERTIES

Color	Clear
Viscosity @ 25 °C, cps	10
Weight per Gallon, lbs.	11.1
Flash Point (COC)	118 °F (48 °C)

STORAGE AND HANDLING

Store in a cool dry place. Keep containers sealed. Use protective gloves to avoid skin contact. Wear safety glasses with side shields. Use only in well ventilated areas.

SAFETY

This material is intended for industrial use only, and the practices of good housekeeping, safety and cleanliness should be followed before, during and after use.

EPOSOLVE 299-R is a blend of chlorinated solvents that may be harmful if swallowed, inhaled or absorbed through skin. Affects central nervous system, liver, kidneys, cardiovascular system and blood. Causes irritation to skin, eyes and respiratory tract. May cause cancer; risk of cancer depends on level and duration of exposure.

Refer to the Material Safety Data Sheet for additional information.
